Daymap by Civica × CIVICA

Daymap Inventory

Stop asking "who has the projector?" Know where every school asset is, who has it, and when it's due back.

THE PROBLEM

Schools track laptops, lab kits and instruments with spreadsheets, paper and memory, so items go missing and stock expires unnoticed.

WHAT WE BUILT

An inventory system for Civica's Daymap platform: every item and unit, loans and returns, custom fields, tags, expiry alerts and search.

WHAT SCHOOLS GAIN

Save staff time

See who has any item and when it's due back.

Fewer losses

Overdue loans and expiring stock are flagged early.

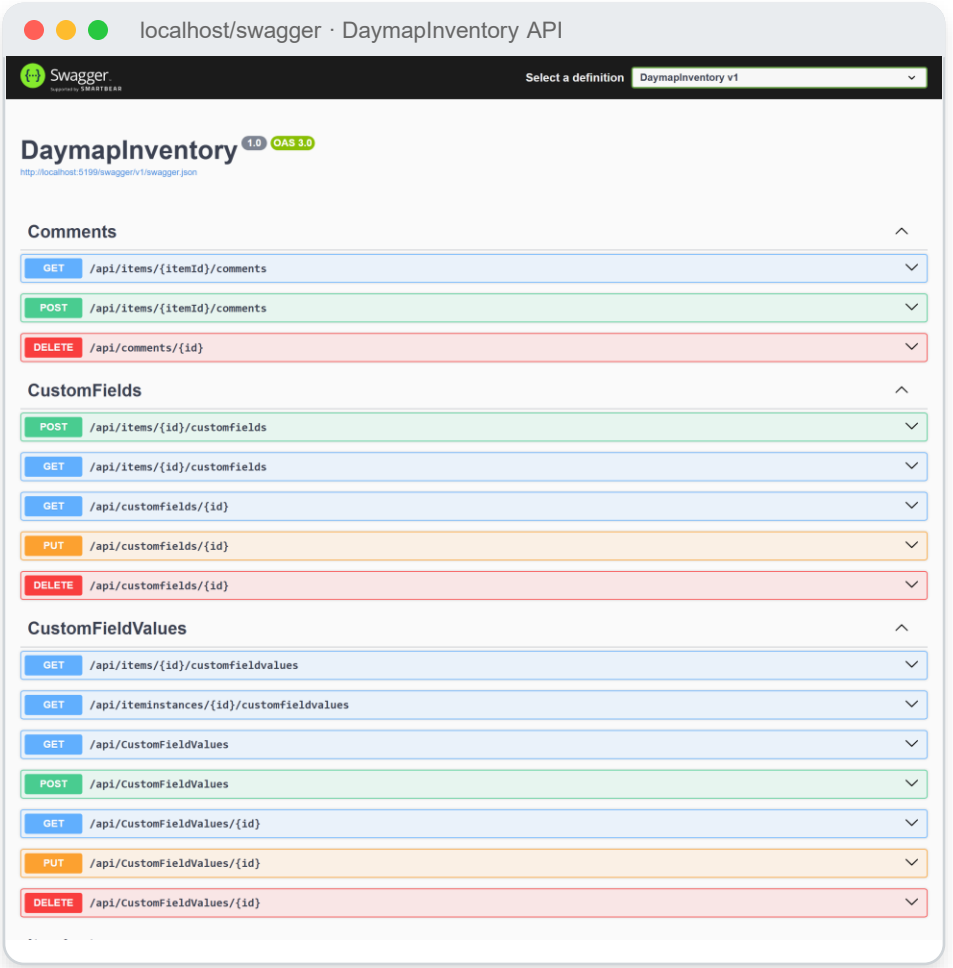

One trusted record

Every item on every campus, set up the way each school works.

40
REST endpoints across the full item lifecycle

105
passing unit tests

Any item
custom fields fit a violin or an iPad

Our working API, documented in Swagger
