Daymap by Civica × CIVICA

SWINBURNE UNIVERSITY OF TECHNOLOGY

Daymap Inventory

Every laptop, lab kit and loan, **tracked in one place**.
A school inventory system built for Civica's Daymap platform.

01 THE PROBLEM

What are we addressing?

Schools track thousands of shared items with spreadsheets, paper and memory.

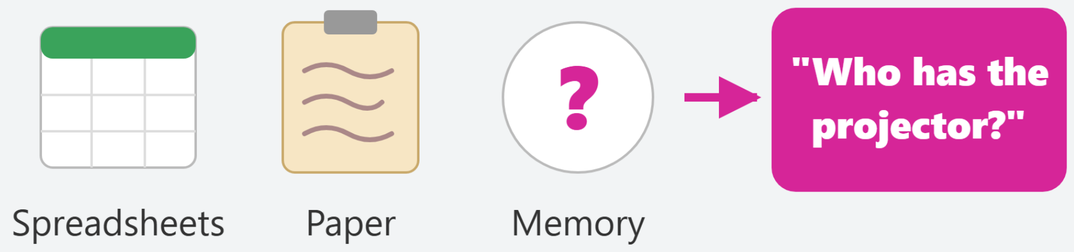

Items go missing
No one knows who borrowed what.

Stock expires
First-aid kits and chemicals go out of date.

No single view
Stock is spread across rooms and campuses.

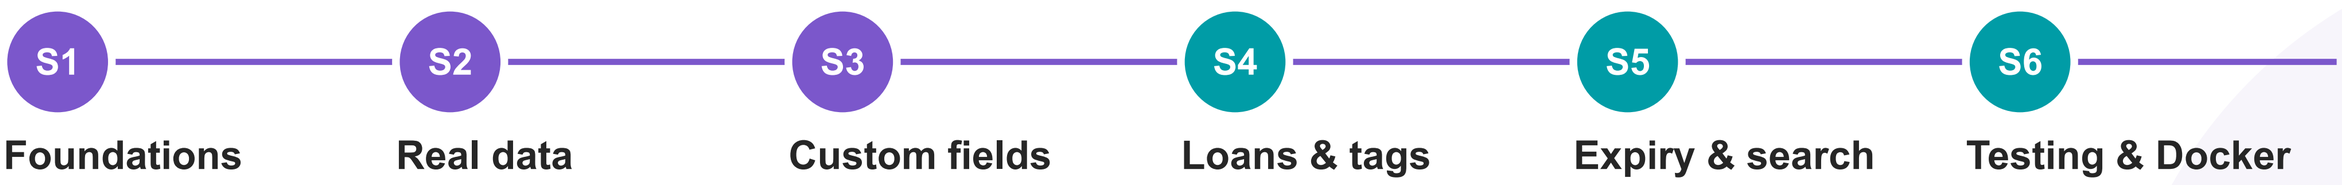

One size doesn't fit
A violin and an iPad need different details.

BEFORE

02 THE PROCESS

How did we approach it?

Agile Scrum in six sprints, reviewed with our client every sprint.

03 THE SOLUTION

What did we develop?

Track every item
Each laptop or kit, one by one

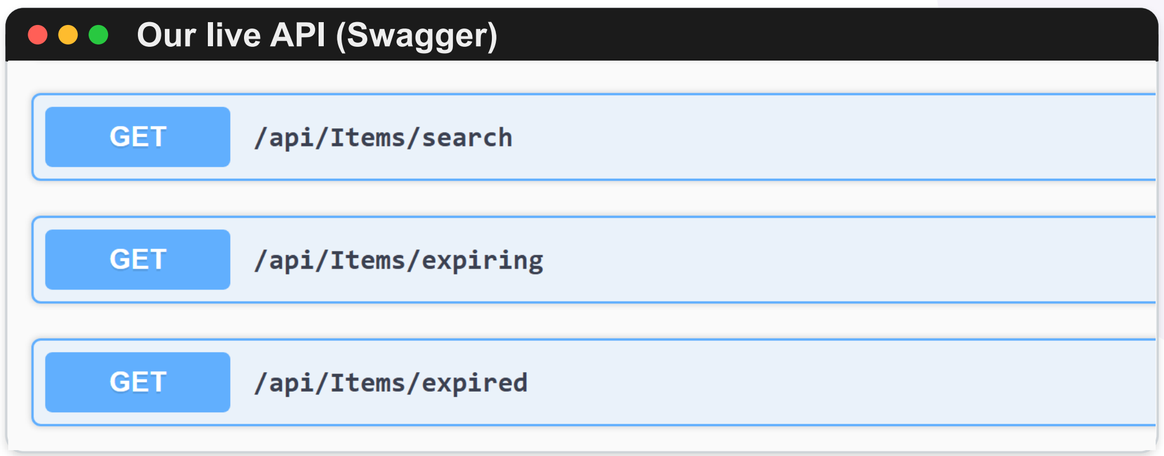

Loans & returns
Stock updates automatically

Custom fields
Each school adds its own

Expiry alerts
Catch out-of-date stock

40 API endpoints

105 passing tests

Search, expiring and expired items, live

WHAT SCHOOLS GAIN

1
Save staff time
See who has any item and when it's due back.

2
Fewer losses
Overdue loans and expiring stock are flagged early.

3
One trusted record
Every item on every campus, set up the way each school works.
